Business units do not include out of Town contractors or home occupations.

Commercial Vacancies 2019

Commercial, Industrial and Office Vacancies

The above counts are based on units available, not square footage. The CD department does not have the capability or the manpower to provide numbers for leasable square feet, nor are we able to track all businesses. Rather than speculate on how many units can fit in a building this survey counted units as they are being utilized today and not based on how many units could be rented if the units were subdivided. As an example, the old Capital One building could be split into a number of smaller units. These business unit numbers can be expected to change even on a daily basis as this is only a snapshot of vacancies as of the date of the survey. The research was informal and was conducted by Community Development utilizing a windshield survey and information from real estate brokers. The survey provides what appear to be vacancies in the various commercial/industrial districts. Please keep in mind that a survey of this type can often miss a few units resulting in some units that will go uncounted, this is especially true for second floor office space that is not advertised. Despite the potential for missing units I believe it is still valid as a barometer of the health of the business community in Purcellville. The purpose is to provide trends. This type of survey can be an invaluable tool that highlights growth or decline on a quarterly basis. By keying in on vacancies as opposed to occupancies it is easier to maintain a record of growth and decline rather than trying to keep track of every single business.

The Town has approximately 800-900 business units with 250- 300 or so being out of town contractors that do business in town and 100 to 120 being home occupations (we don't have the capability to track home businesses with our present financial software system, therefore this is a guesstimate.) *Source: Purcellville Finance Department*
